

# SPRING / SUMMER 2006

The New Show - TRICYCLE

Well it is spring finally and it feels like summer is just around the corner. Time to get a newsletter out before we get too busy to think around here. It is going to be a very exciting summer with the debut of our new show [TRICYCLE](#) as well as many other shows throughout Canada and abroad.

Before we get started I would like to take a minute to thank all our supporters and crew. This will be our fourth year here in Toronto and our work and the scale of performances has grown beyond what we could have imagined back in 2003 when we relocated here from Vancouver. This is due to the agents, event planners and producers who are willing to take a risk and engage a group like us to create something different. It is also the direct result of our fantastic team of artists and technicians that we have built up over this time.

Here is a heart felt thank you to all of you who have helped make our time here so exciting and rewarding. We look forward to our best year yet!

A handwritten signature in black ink, which appears to read "Tom Comet" followed by a stylized star or asterisk.

## BLOCKSTORM

**Where:** 237 Richmond Street, Toronto

**When:** June 17th, 2006, 7:30pm & 10:45pm

This is a free event!

One of the things that we do best at Circus Orange is create custom spectacle shows that incorporate live performance, special effect and large interactive sets. Often these shows are based around a client's specific theme and this is exactly what General Motors asked of us for an extra special event that they have coming up this June 17th in downtown Toronto.

Blockstorm is the name of the event and the theme is, you guessed it, cars. The custom created Circus Orange performance is but one aspect to a whole parking lot that will be crammed with free entertainment throughout this day long event. There will be many surprises and all we can say is that you better come down and check it out as this looks like it will be the biggest street party of the summer.

As well as a huge outdoor concert Circus Orange will be providing two large scale spectacle shows around the theme of cars, fire and industrial madness. Look for the large flames, stunt performers aerialists, acrobatics and pyro as the sparks are sure to fly! For more information check out [www.blockstorm.com](http://www.blockstorm.com)

### WANT TO BOOK CIRCUS ORANGE?

Drop by our [web site](http://www.circusorange.com), download one of our *Event Request Forms* and email it back to [bookings@circusorange.com](mailto:bookings@circusorange.com).

This way we can get a good idea of your event details and provide you with the best possible show proposal in the shortest amount of time.

## SPECIAL EFFECTS NEWS CRYO JETS NOW AVAILABLE!

As part of our never ending quest to have all the latest and greatest special effects gadgets the boys in the shop recently acquired a new technology called CRYO JETS. These are high powered CO2 jets that shoot a very controlled jet of CO2 up to 20' in any direction. With various nozzles and accessories instant 'fog walls' and screens are possible. Multiple jet effects can be linked together to create elaborate chase sequences. Because this is a non-pyro effect it is fast and relatively easy to implement. Call for pricing and ideas.

New CO2 Jets in Action

Many people don't know this but as well as creating our famous live performances Circus Orange is a full service special effects company. Here is a list of some of the more popular effects that we offer:

- Propane Flame Dragons
- Smoke & Atmospheric Effects
- All Pyrotechnic Effects
- Fireworks
- Fluterfetti
- Liquid Flame Effects
- Movie Special Effects

For more information of our special effects click [HERE](#).

# TRICYCLE

All TRICYCLE Images  
by Matt Johnson  
of Karma Pix

The really exciting news this summer is that we have a brand new touring show. This show is entitled TRICYCLE and it is a 50-minute long outdoor roaming pyrotechnic spectacle performance. This show is specifically designed for large outdoor festival sites with multiple performance stages. The show revolves around a gigantic mobile tricycle rig that is driven by our lunatic clown character - Foo. The tricycle also houses our live musician, portable PA, many special effects surprises and our ensemble cast of performers. The show is a journey of discovery for the characters on the tricycle as they travel their surreal world interacting with the places and characters they meet along the way.

As well as performing on and around the TRICYCLE itself various stage acts are incorporated into this show. For the dramatic finale the front wheel is removed from the TRICYCLE and hoisted 60' in the air beneath a crane. A performer inside the wheel causes it to spin as pyrotechnics explode out from the wheel and high into the nights sky as our other performers dance below.

TRICYCLE is a site specific spectacle performance and that means that it will be a slightly different design on every site we perform on. If possible we integrate the local architecture and stage different scenes in the areas that work best. The pyrotechnics can be scaled up or down depending on the site, logistics and budget.

For more information on this exciting show click [HERE](#).
